BrightPath Tech - Enterprise CRM Platform Proposal

Fast, affordable CRM launch in six months.

1. Executive Summary

Northwind Retail Group (the Client) is seeking to replace its legacy on-premises customer management system with a cloud-based Enterprise CRM platform. The solution must manage approximately 5 million customer records, support 2,000 concurrent users, integrate with the Client's SAP ERP and Mailchimp email platform, and meet SOC 2 Type II and GDPR requirements. The target implementation window is 12 months with a budget range of USD 400,000 to USD 900,000.

BrightPath Tech proposes the lowest-cost and fastest route to a working CRM platform: a six-month implementation at a total price of USD 450,000. We focus on speed and affordability by using a proven out-of-the-box platform with light configuration rather than heavy custom development.

We want to be transparent that our compliance program is still maturing and our enterprise track record is more limited than some larger vendors.

2. Proposed Solution and Implementation Approach

BrightPath delivers a configurable SaaS CRM with prebuilt connectors for common ERP and email platforms. We minimize custom code to accelerate deployment and keep costs low.

- Out-of-the-box CRM with light field and workflow configuration.
- Prebuilt connectors for SAP ERP and Mailchimp (limited customization).
- Web and mobile access for field teams.
- Standard dashboards and reporting.

3. Timeline, Team Structure and Milestones

Delivery is planned across three phases over six months.

- Team of 8 including a project manager and two configurators.
- Fast-tracked schedule relies on minimal customization.

Phase	Milestone	Month
Phase 1	Kickoff and configuration	1
Phase 2	Data import and integration setup	2-4
Phase 3	UAT and go-live	5-6

4. Price Table and Assumptions

Assumptions: pricing is valid for 60 days; excludes migration of legacy custom objects; custom integration development beyond the prebuilt connectors is billed separately.

Item	Amount (USD)
Software licenses (annual)	180,000
Implementation services	180,000
Integration setup	60,000
Training	30,000
Total	450,000

5. Security, Compliance and Risk Controls

BrightPath maintains standard data encryption and access controls. Our SOC 2 Type I attestation is currently in progress and is expected to be completed within twelve months.

- SOC 2 Type I attestation in progress (Type II not yet available).
- Basic GDPR measures; formal data-residency options are limited.
- AES-256 encryption at rest and TLS in transit.
- No dedicated full-time compliance officer on the delivery team.

6. Support Model, Experience and References

Support is provided by email during business hours. 24/7 support is not currently available.

- Five CRM implementations, primarily for small and mid-sized clients.
- Three references available; all are small-business deployments.
- Limited enterprise-scale reference history.
