Orbit Digital - Enterprise CRM Platform Proposal

Proven experience and flexible delivery for enterprise CRM.

1. Executive Summary

Northwind Retail Group (the Client) is seeking to replace its legacy on-premises customer management system with a cloud-based Enterprise CRM platform. The solution must manage approximately 5 million customer records, support 2,000 concurrent users, integrate with the Client's SAP ERP and Mailchimp email platform, and meet SOC 2 Type II and GDPR requirements. The target implementation window is 12 months with a budget range of USD 400,000 to USD 900,000.

Orbit Digital brings over fifteen years of enterprise CRM delivery experience and a strong set of referenceable clients. Our proposal emphasizes proven methodology and long-term partnership.

Our total price is USD 690,000 with a ten-month delivery schedule. Our integration approach is intentionally flexible and will be finalized during discovery.

2. Proposed Solution and Implementation Approach

Orbit proposes a configured enterprise CRM platform built on our proprietary delivery methodology. We emphasize business-process alignment and user adoption.

- Configured enterprise CRM aligned to the Client's sales and service processes.
- Proprietary delivery methodology with stage gates.
- Integration approach to be assessed and finalized during discovery.
- Strong training and knowledge-transfer program.

3. Timeline, Team Structure and Milestones

Delivery is planned across four phases over ten months.

- Team of 11 including a solution architect and training lead.
- Integration plan will be finalized after discovery.

Phase	Milestone	Month
Phase 1	Discovery and integration assessment	1-2
Phase 2	Configuration and data migration	3-6
Phase 3	Integration build and UAT	7-9
Phase 4	Cutover and hypercare	10

4. Price Table and Assumptions

Assumptions: pricing is valid for 90 days; integration estimate assumes standard SAP ERP and Mailchimp connectors and will be confirmed after discovery.

Item	Amount (USD)
Software licenses (annual)	280,000
Implementation services	310,000
Integration (scope to be confirmed)	70,000
Training	30,000
Total	690,000

5. Security, Compliance and Risk Controls

- SOC 2 Type II certified.
- GDPR compliant.
- AES-256 encryption at rest and TLS in transit.
- SSO, MFA, and role-based access control.
- Security risk assessment during discovery.

6. Support Model, Experience and References

Orbit provides 24/7 support with a dedicated account team and a 99.9% uptime SLA.

- Eighteen enterprise CRM implementations over fifteen years.
- References available from four large enterprise clients.
- Strongest reference base among the responding suppliers.
